

Brush Chopper / Mulcher HGM

Improved version for vineyards, landscape gardening and forestry

- Compact build construction
- Linear lateral adjustment - wide adjustment range
- Smooth outer surfaces - low height construction
- High feeding hopper

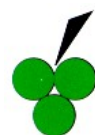

Standard equipment:

Robust welding construction for difficult conditions, extremely strong working shaft and bearings, heavy flails made of special steel alloy, husker shredder, tines for wood collecting, running cylinder or support wheels adjustable in height, three-point hitch with linear lateral adjustment, transmission mounted laterally, foot rest, accident preventer, free-wheeling integrated in transmission.

Optional equipment upon request:

- Double-acting hydraulic cylinder with tubes for linear adjustment
- Rear and front add-on unit with transmission piercer and double three-point hitch with linear lateral adjustment
- Cardan shaft

Type	Total width/m	Working width/m	Hammer	Weight kg
HGM 1550	1,55	1,50	12	450
HGM 1850	1,85	1,78	14	520
HGM 2150	2,15	2,00	16	640
HGM 2450	2,45	2,30	20	690
HGM 2650	2,65	2,50	20	730
